MeCaWear A5

TECHNICAL DATA SHEET

MeCaTeC

Wear Protection Compound with KEVLAR®

DESCRIPTION

MeCaWear A5 with KEVLAR[®] is a high performance paste grade polymer coating. The two-part coating incorporates a high loading of alumina and silicon carbide within the resin and hardener system that when reacted cures to provide a surface with outstanding wear protection.

MeCaWear A5 is composed of four primary ingredients; a high performance polymer, silicon carbide particles, angular alumina particles and interlocking KEVLAR fiber.

MeCaWear A5 has been formulated to allow for versatility in many applications, with no special tools and without the need for additional heat. Plus, it is suitable for use on both new and worn parts. It can be cast into irregular shapes for use as a wear pad or wear plate. MeCaFix 100 and 120 can be used to bond the precast wear pad to the surface.

APPLICATIONS

•Pipe Elbows	•Ash Handling Pipe	•Slurry Pumps
 Screw Conveyors 	 Ceramic Tile Repair 	 Chutes
 Pulverizers
