

Foundation Drilling Auger Flights

Welding Consumables • Pre-Hardfaced Flights

IMPROVE AUGER WEAR LIFE BY 30 - 50%

We engineer gas assisted, open arc and stick electrodes with complex carbide alloys that combine chromium with niobium, vanadium, and molybdenum to form finer, harder carbides that resist abrasion and impact better than standard chromium carbide layers.

► **Buy WELDING CONSUMABLES and reinforce your auger flights**

Gas Assisted: EnDOtec® DO*327
Open Arc: TeroMatec® OA 4660
Electrodes: AbraTec® 6710 XHD

► **Buy REPLACEMENT FLIGHTS and weld them to your auger shaft**
