# GOODAIRE 1202

## EFFECTIVE EXTRACTION TECHNOLOGY

- The system with the best value for your money
- High filtration efficiency (> 99.9%)
- Cost-effective dedusting of the filter with compressed air ensures easy, economical operation
- No dust exposure when emptying the tilting filter bin
- Compact, sturdy plastic housing
- Approx. 60 dB noise level
- Ergonomic extraction arm and suction head designed according to the latest fluid flow research
- External hinge arm ensures low contamination and low maintenance requirements
- Can be used as a filter for soldering fumes
- Recirculation mode option for welding high-alloy steels
- Also available with BIA W<sub>3</sub> certification (BIA is the BG Institute for Occupational Safety & Health)

Details of the dust-free emptying of the filter residues

## SPECIFICATIONS:

<b>Power required:</b>	<b>1.1 kW</b>
Mains voltage/frequency:	230 V / 50Hz
Rated air flow:	1,000 m <sup>3</sup> /h
Filtration area:	10m <sup>2</sup>
Inlet diameter:	140 mm
Dimensions in mm (L x W x H):	960 x 850 x 1370
Protection class:	IP 54
Rated current:	2.6 A
Maximum vacuum:	1600 Pa
