Fine Grade Wear Protection Compound

#### DESCRIPTION

MeCaWear A7HT with fiber is a high performance paste grade polymer coating. The two-part coating incorporates a high loading of fine spherical alumina within the resin and hardener system that when reacted cures to provide a surface with outstanding wear protection at high temperature.

MeCaWear A7HT can be troweled to a smooth finish and is used in fine particulate wear applications where the repair compound is applied less than 1/4" (6.3 mm).

MeCaWear A7HT is suitable for use on both new and worn equipment components and may be top coated with MeCaWear or MeCaCorr coatings to provide contrasting colors for visual wear indication.
